

## Product description

### GRAY NEEDLE FELT DAMPING MATERIALS:

- Sustainable acoustic product with excellent noise-absorbing properties
- Dimensionally stable, flexible and strong
- With a density of 800g/m<sup>2</sup> this product has high absorption factor
- The composition is very consistent
- Consists for 100 % of natural gray dogwood, Gotland sheep
- Living & breathing material
- Absorbs moisture
- Fels soft and does not cause itching or irritation as some other products do. This makes the product pleasant to use. In addition, the product does not release inhalable fibres.
- Improves your acoustics in a sustainable manner
- Fire safety; Wool is naturally flame resistant and offers a greater level of fire safety than other fibres. In addition, wool does not melt, drip or stick to the skin when it burns
- Thickness approx. 9 mm
- Dimensions of the panels 200 x 50 cm
- Easy to cut to size

Other formats can be offered. The format is always 200 cm, but the other dimension can be cut to other lengths.

## Applications

- Acoustic material for processing in wall panels
- Sound absorption for behind perforated ceiling systems
- Sound absorption for stretch ceilings
- Excellent attenuator in speakers
